LEADS 3.0

Let's Get Started

- Why the change?
- What is OpenFox Messenger?
- Training and resources provided

Why the change?

- **LEADS is a complex system which integrates data from various federal and state databases to one source for secured and reliable information to the criminal justice community. LEADS has been doing so for over 50 years.**
- **To provide a modernize and enhanced system to better serve the criminal justice system.**
- **To bring LEADS in line with NCIC guidelines. LEADS is now NCIC based**

Changes....

- LEADS 3.0 offers myriad upgrades to the legacy system - two of those are online validations and automated criminal history record information (CHRI) monthly logs.
- These will be available online in an electronic version **only**.
- In order to access validations and CHRI reports, this requires **LEADS2000** agencies to have at least one installation of Messenger, including interface agencies. This is a replacement software for LEADS2000, and the Receiver.
- If your agency or center that provides your LEADS access does not have LEADS2000 and a Receiver, please contact ISP.LEADS30@illinois.gov to request one.

What is OpenFox Messenger?

- **ISP has partnered with Computer Projects of Illinois (CPI), a company whose state switch infrastructure and computerized hot files are implemented in 30 states and nine Federal Agencies across the USA.**
- **ISP is leveraging both CPI products and experience, while embarking on a new business model.**
- **CPI will host all LEADS system components within their CJIS-compliant secure data center in Bolingbrook, Illinois, including the message switch, computerized hot files (CHF), and interfaces (NCIC, Nlets, NICS, SOS, IDOC, CHRI, FOID, CCL).**
- **OpenFox Messenger is a stand-alone program, no longer relying on an internet browser**
- **User Friendly in a format**

 - The training today will build off of those videos
