Mandatory 2026 Police Employee Data

Each year the national Uniform Crime Reporting (UCR) Program collects information on the number of full-time law enforcement personnel employed within participating agencies. At this time, the FBI is requesting counts on the number of officers and civilian employees on each department's payroll as of October 31, 2026. To ensure correct employee data are maintained by the national UCR Program, please reference the PDF guide found on the NIBRS homepage under Resources titled, "Law Enforcement Employee Data Reporting Guide".

Receipt of individual counts will ensure that each agency is accurately represented, and that all data can be processed and included in the annual publications, Crime in the United States and Law Enforcement Officers Killed and Assaulted (LEOKA). Please note, in the LEOKA publication, state and national officer assault data represent only those agencies for which both an annual police employee count and 12 months officer assault data were reported.

Police employee data are now used in the National Use of Force data collection and are a contributing factor in publication determination.

Please provide the 2026 police employee counts to the national Program **by December 31st, 2026**. Data must be entered into the INR production site (illinois.nibrs.com). Thank you for your assistance and your continued participation in the national UCR Program.

If you have any questions, feel free to email the I-UCR team at ISP.UCR.Access@Illinois.gov
