BASE REGISTRATION OFFENSE SOR/VOAY CONVICTION

As agencies enter, modify, or validate Sex Offender and VOAY/Murderer records, it is important to ensure the base registration offense/s that required the offender to initially register is entered into the LEADS Record beginning with (Citation 1) and moving on from there. Violations and subsequent offenses should never be in the (Citation 1) Field, these should be added chronologically oldest to newest after the base registration offense/s. This will ensure other programming searches can identify and capture the initial reason the offender was required to register. Agencies should be requesting and reviewing criminal history information every time an offender registers with the agency. The conviction dates should match with the criminal history information. This will ensure the records are maintained accurately.

** REGISTERED OFFENDER INFORMATION **
