NLETS Help Files

NLETS provides help files for all 50 states for a variety of topics, including driver's license, vehicle registration, VIN information, and CHRI information. These help files should be your first reference when you have a question about making an inquiry through another state or interpreting an out-of-state response.

To access the NLETS help files in LEADS 3.0. From the **Forms Tree** on the left side of the user Mailbox in Messenger. Select NLETS QUERY. Click on NLETS Help

After the NLETS Help form opens, select the tab by State, by Federal, by Canadian or by NLETS. Users can find the specific state directly by typing the two-digit state code in the "Help File" field. Select the dropdown arrow to find the file where help is needed.

Users can also scroll all the other tabs, select the dropdown arrow to see the help file choices for that specific set of files.
