LEADS 2000 User Registry - Status Code "N" Level of Access

When a user is entered into the LEADS 2000 User Registry, a record is also placed in the RACF security system to ensure authentication and security of LEADS/NCIC access. For security reasons, the user's record will be revoked (inactivated) in RACF if the user fails to log into LEADS 2000 for 180 days. See the 020312 Daily Briefing for steps on how to reactivate Users who have been deleted from RACF for 180 days of inactivity.

A "Trainee" should NOT be entered as status level of "N" just because they are not LEADS certified yet. The Trainee should be entered as either "L" or "F" to indicate the level of certification that will be required. "N" should only be used if they will never log-on and use the LEADS 2000 client; will only be using the CAD or MDC interface for LEADS access. A Trainee has 6 months from date of entry in User Registry to become LEADS certified.

Since most RACF deletions occur with users who primarily use a mobile data computer or interface/CAD system to access LEADS, and therefore don't often log into LEADS 2000, an additional status level was developed in the User Registry. Status level "N" may be utilized when entering a user who will not be accessing LEADS via LEADS 2000, but instead will be accessing LEADS via an MDC or interface/CAD system ONLY. Entry with "N" will allow the user's record to be placed in the agency's LEADS 2000 User Registry, but not in RACF. Therefore, 180 days of inactivity won't be an issue. Keep in mind, however, that users entered with status "N" will have no access to LEADS via LEADS 2000 or to SOS Images. As a result, if a user will be accessing LEADS 2000, even infrequently, status "N" should not be used. Instead, the appropriate certification level (L or F) should be used. The user must then ensure that he/she logs into LEADS 2000 at least once every 180 days in order to prevent RACF revocation. Access level "N" has been added to the LEADS User Registry screen under Level of Access Values and Descriptions.
