FBI Data Collection & Publication

On October 30, 2024, the FBI held a Technical Town Hall meeting for all State UCR Program Administrators to discuss a change in national crime data public reporting periods. Currently, the FBI posts data for public viewing quarterly. However, beginning in November 2024, this reporting of data will occur monthly instead of quarterly and have a reporting deadline of the 14th of each month for the prior month's data. This will allow for more timely, up-to-date reporting of national crime data. All data sent in prior to the 14th of each month will be included on the monthly publication. Any data sent after the 14th will be included on the next month's publication. Every month, following the 14th data deadline, the current data fields will be updated to include all new data.

Law Enforcement Employee data will remain as a yearly publication. Although quarterly data reporting is ending, the public will still have the ability to conduct a custom search for a specific month and/or year as well as quarterly data.
