LEADS Number Identifiers

LEADS alignment with NCIC includes changes to some LEADS Number Identifiers. All previous LEADS Number Identifiers that changed have been modified in the LEADS 3.0 system. In order to query, modify, cancel or clear users must use the new LEADS Number Identifier for the record, only the Letter Identifier changed in legacy records. See the chart below for the Letter Identifier.

For example:

Stolen License Plate Letter Identifier changed.

LEADS 2000: <u>L</u>21A1234 LEADS 3.0: <u>P</u>21A1234
