Expired LEADS Certifications in nexTEST

When a LEADS certification expires, the nexTEST portal does **NOT** automatically move the learner to the Initial Certification path.

LACs with email addresses in the nexTEST system will be notified 60 and 30 days before a user certificate expires.

It is the LAC's responsibility to notify agency's users when the certification expires.

If a certification does expire, the LAC needs to assign the correct initial certification level. This is covered under section 3 and 5 on the nexTEST FAQ document. nexTEST documents are located on the CJIS

Launchpad: <https://illinois.cjisapps.com/launchpad/cjisdocs/docs.cgi>

If you have any questions or need help with nexTEST please contact the ISP Help Desk at 866/LEADS-00 (866/532-3700).
