LEADS Daily Bulletin March 4, 2022

Previous Inquiry Notification (PIN) change

- The PIN inquiry in LEADS 3.0 has changed and will no longer return all inquiries made within the last ten days.
- For any given record, PIN responses will ONLY display up to the **latest 10** stations (CDCs) that searched for any given record.
 - If an individual query this record multiple times throughout the last 10 days, only their most recent search will be displayed on the PIN along with up to 9 other stations (CDCs) searching that same file.
- Records will also display the number of total times the user has been searched in a 10 day period, at the bottom of the response
 - Users will have to request offline searches to get the full list of stations (CDCs) that have inquired on that record for the given time period.

Example Display (Previous Inquiry Notification):

Previous Inquiries within last 10 days on LIC/BJ9999:

Agency	Station	Date/Time	MKE	Operator
AnytownPD	CD1	20210719:1307	QV	User1
