LINKAGE

Linkage of records between agencies is an NCIC function and is not available for LEADS-only records. Linkage may be used for LEADS records entered into both LEADS and NCIC, however, the linkage information will only appear in the NCIC portion of the record.

- a) LEADS users can link two or more agencies records in NCIC when conducting joint investigations.
- b) Example: After the first agency has entered a stolen or felony vehicle, the second agency entering a stolen vehicle on a shared case will enter the ORI of the agency that entered the first record in the Linkage Agency ID (LKI) and the LEADS number of that agency's stolen vehicle record in the Linkage Case # (LKA). Subsequent agencies desiring to enter, and link records related to the multi-jurisdictional case would also use the ORI from the first agency's entry in the LKI, and the LEADS number from the first agency's entry in the LKA.
