## DAILY BULLETIN October 23, 2023

## LEADS INTERFACE TRANSITION Sunset date - December 31, 2023

As per the letter addressed to Agency Chiefs in February 2022, in order to leverage the new functionality that LEADS 3.0 offers – hot file images, driver's license images from Illinois and NLETS, sharing of attachments and images – agencies must ensure all interfaces are upgraded to the new connection (FoxTalk) and language (OFML) specifications. The new connection methodology (available at <a href="https://isp.illinois.gov/LawEnforcement/LEADSInterfaces">https://isp.illinois.gov/LawEnforcement/LEADSInterfaces</a>) allows all interfaces to program and leverage functionality provided by LEADS 3.0 using up-to-date technology.

Because this will be a significant endeavor for many agencies, the Illinois State Police is setting a sunset date of **December 31, 2023**. All interfaces will need to be configured, tested, and implemented using the new connection specifications prior to the sunset date. At that point in time, the legacy connection manager will be decommissioned.

Please contact ISP LEADS Administration at <a href="mailto:ISP.LEADSADM@illinois.gov">ISP.LEADSADM@illinois.gov</a> with questions pertaining to this Daily Bulletin.
