enclosure: Modification Plan

NARRATIVE STATEMENT:

(Provide a detailed summary of system operations for a modified 9-1-1 plan. Also, if incorporating an NG9-1-1 solution, please include the additional items listed below pursuant to 1325.205 b)12).

- 1) Indicate the name of the certified 9-1-1 system provider being utilized.
- 2) Explain the national standards, protocols and/or operating measures that will be followed.
- 3) Explain what measures have been taken to create a robust, reliable and diverse/redundant network and whether other 9-1-1 Authorities will be sharing the equipment.
- 4) Explain how the existing 9-1-1 traditional legacy wireline, wireless and VoIP network, along with the databases, will interface and/or be transitioned into the NG9-1-1 system.
- 5) Explain how split exchanges will be handled.
- 6) Explain how the databases will be maintained and how address errors will be corrected and updated on a continuing basis.
- 7) Explain who will be responsible for updating and maintaining the data, at a minimum on a daily basis Monday through Friday.
- 8) Explain what security measures will be placed on the IP 9-1-1 network and equipment to safeguard it from malicious attacks or threats to the system operation and what level of confidentiality will be placed on the system in order to keep unauthorized individuals from accessing it.

Plan Narrative:

1. The certified 9-1-1 system provider is AT&T.
2. Northwest Central Dispatch System follows the National Emergency Number Association's Call-Answering standard, which is measured monthly. NWCDS is an Accredited Center of Excellence (ACE) with the International Academy of Emergency Dispatch (IAED) for Emergency Medical Dispatch (EMD) and Emergency Fire Dispatch (EFD). All of NWCDS' training for both new hires and continuing education has been validated by the APCO Project 33 requirements, and NWCDS is partnered with the National Center for Missing and Exploited Children (NCMEC). That partnership involves meeting all requirements for call-receiving when dealing with calls for missing children. Adding the Village of Barrington will not change adherence to national standards, protocols, or procedures already in place.
3. The 9-1-1 system has full redundancy for our existing eleven (11) communities, including a backup center at the Schaumburg Police Department. Trunks are diversified and 9-1-1 calls can either be handled at NWCDS' main location in Arlington Heights, at the Schaumburg Police Department, or both at the same time. In the last year, due to COVID-19, the backup center has been activated on five (5) different occasions, for weeks at a time, to socially distance our staff. The Motorola Premier 1 CAD system has fully redundant servers at NWCDS and the backup location located at the Schaumburg Police Department with nearly simultaneous disaster recovery. No other 9-1-1 authorities share our equipment.
4. In January of 2021, NWCDS transitioned to the Solacom phone system. The system is NG9-1-1 ready and capable of transitioning from legacy wireline, wireless, and VOIP networks to the State's new system with AT&T. The staff at NWCDS have been following guidelines for GIS and ESInet implementation and implications. The backup at the Schaumburg Police Department will remain with dual connections to NWCDS (microwave and Comcast EVPL).
5. Split exchanges will be routed by the 9-1-1 provider, AT&T. One-button transfers will be programmed on the phone system for efficiency, in the event a call is routed incorrectly.
6. There are no changes to how the databases are maintained, which is an ongoing and daily process. Changes are submitted by users directly through the phone system, as they occur, such as MSAG changes. NWCDS utilizes Amazon cloud services for backup.

Plan Narrative:

7. NWCDS has two (2) employees that are responsible for overseeing, maintaining, and updating the data. They work Monday - Friday and do not take the same extended time off.

8. NWCDS maintains it's own facility with a non-advertised location. The facility has a large security fence around the entire property and access can only be gained by key-card or by allowed (bell notification) entry. NWCDS takes many steps to protect its networks including isolating the 9-1-1 network from other networks and outside access, Barracuda internet filtering, anti-virus programs, and email blocking. NWCDS has a contract with Prescient Solutions for our IT staff and resources. NWCDS recently implemented stricter password requirements and more frequent changes to those passwords. NWCDS has strict written directives dealing with confidentiality in place and a robust quality assurance process to ensure policies are being followed.

Summary of System Operations for a Modified 9-1-1 Plan:

The Village of Barrington is currently a member of the CenCom E9-1-1 Joint Emergency Telephone System (JETS). CenCom receives 9-1-1 calls and dispatches the Village of Barrington's municipal police and fire departments.

By Village of Barrington and Northwest Central Dispatch System (NWCDS) Board action, NWCDS will begin receiving 9-1-1 calls and dispatching the Barrington Police and Fire Departments on or about June 1, 2022. The Village of Barrington has signed the intergovernmental agreement with Northwest Central Dispatch System and the Northwest Central 9-1-1 System. As such the Village of Barrington will be added to the Northwest Central 9-1-1 System (Emergency Telephone System Board) and will no longer be a part of the CenCom E9-1-1 Joint Emergency Telephone System (JETS). Copies of the intergovernmental agreement are attached to the submission.

NWCDS was formed in 1972. It is a model of shared government services. NWCDS dispatches for eleven (11) police departments and eleven (11) fire departments. The Village of Barrington will become our 12th police and 12th fire departments. Additionally, NWCDS is the MABAS dispatch center for Division 1, the ILEAS callout center, the NIPAS callout center, and the IL-TERT callout center.

FIVE YEAR STRATEGIC PLAN FOR MODIFIED PLAN

(Provide a detailed summary of the proposed system's operation, including but not limited to, a five-year strategic plan for implementation of the modified 9-1-1 plan with financial projections)

Narrative:

Northwest Central Dispatch System (NWCDS) and the Northwest Central 9-1-1 System are eager to add the Village of Barrington, including the Barrington Police and Fire Departments to our existing eleven (11) member communities. Barrington closely borders Palatine and Inverness, and there are operational efficiencies that can be gained by adding Barrington. Additionally, the revenue received by Barrington from member assessments and 9-1-1 surcharges will help reduce costs to our existing members and solidify NWCDS as a premier 9-1-1 system and PSAP.

The five (5) year plan of NWCDS include continued improvements to our building. In the last four (4) years, NWCDS has replaced all the windows, the roof, and the parking lot for the facility. Future projects for the five (5) year plan include, but are not limited to remodeling bathrooms, replacing carpeting, and painting the interior of the entire facility. Enhancements will be made to the security gate and the key-card access system. Last, funds are being reserved on an annual basis for unforeseen, long-term projects.

The five (5) year plan for the Northwest Central 9-1-1 System includes, but is not limited to software, hardware, and other equipment replacement for the PSAP. The Motorola PremierOne CAD/Records/Mobile Data system was implemented in March of 2021. The Solacom 9-1-1 CPE (phone system) was implemented in January of 2021. Three (3) UPS (uninterrupted power supply) are used for the PSAP; two (2) have been replaced in the last four (4) years, with the 3rd being replace by the end of 2021. Other Northwest Central 9-1-1 future projects include radios and radio equipment, computer hardware replacement, and updating servers and switches. Last, funds are being reserved on an annual basis for unforeseen, long-term projects.

Most importantly, we realize the importance of planning for Next Generation 9-1-1. We have allocated funds in CY2022 for consulting to assist our staff with the Statewide ESInet project. We keep well informed of changes and requirements by the State of Illinois.

The estimated capital reserve fund balance for NWCDS at the end of CY2026 is \$1,439,469.40.

The estimated capital reserve fund balance for Northwest Central 9-1-1 at the end of CY2026 is \$1,246,173.18.

PARTICIPATING AGENCIES

Provide a list of public safety agencies (Police, Fire, EMS etc.) that are to be dispatched by the 9-1-1 System. Each Agencies land area(s) in square miles and estimated population which will have access to the proposed 9-1-1 System. Do not forget to include County Sheriff's jurisdiction and Illinois State Police Districts. Each agency that appears on this list should also have signed a call handling agreement.

TEST PLAN DESCRIPTION

1) Description of test plan (back-up, overflow, failure, database).

NWCDS has a fully redundant backup center (CAD, 9-1-1 CPE, dispatch positions) at the Schaumburg Police Department. Staff is scheduled at the backup center regularly. For example, staff occupied the backup center 4 times for 2-week periods in 2021. This is scheduled to occur quarterly in 2022 as well. AT&T conducts testing of the 9-1-1 trunks.

Testing for Barrington will include coordinating with AT&T prior to go-live and after go-live to ensure calls are properly routed to NWCDS. It will also include coordinating with wireless carriers to make sure cell towers are properly assigned to NWCDS in the weeks prior to go-live. There may be a period of time when wireless calls will be received at NWCDS, but will need to be transferred to Cencom. Transfer tests will be conducted with Cencom.

Full radio coverage tests for dispatch are also ongoing.

2) List wireline exchanges to be tested.

NWCDS has participated in line diversity testing with AT&T on 9-1-1 trunk lines to ensure the integrity of the system. There is diversity in that trunks are received from AT&T's locations in Lombard and Elk Grove Village. Lisa Wirtnanen has developed a diagram that shows the diversity of trunks for NWCDS.

3) List of wireless and VoIP Carriers to be tested.

Verizon, AT&T, Sprint, T-Mobile are the wireless carriers to be tested. Cricket and MetroPCS are two of the VOIP providers to be tested. Regular annual testing is completed. RapidSOS is also used for enhanced caller location and tested. Again, coordination will occur with wireless carriers to ensure appropriate towers are routed to NWCDS.
