Plan Narrative:

Narrative

With respect to narrative statement requirements, Proviso-Leyden Joint 9-1-1 Authority states the following:

The requested modification from the Proviso-Leyden Joint ETSB requests two items.

1. The change of the Backup PSAP from Schiller Park and Broadview to the Cicero 9-1-1 center, through the Town of Cicero ETSB (CERCCC). Following the consolidation of Schiller Park to Municipal Consolidated Dispatch (MCD), MCD did not wish to continue the backup agreement. Broadview as a standalone 9-1-1 center is unable, in our opinion, to serve the backup capacity for a multi-position 9-1-1 center. We have found a willing partner in the Town of Cicero, and the modifications have been made upon emergency order.
2. The Village of Stone Park has chosen to leave the Cook County ETSB and join the Proviso-Leyden JETSB. Currently, NORCOMM 9-1-1 the PSAP for the Proviso-Leyden JETSB dispatches for the Village of Stone Park Police and Fire Departments. In order to reduce the number of transfers for calls for assistance, we request that Stone Park be allowed to leave Cook County ETSB and be approved to join our JETSB, with modifications made to make NORCOMM 9-1-1 the Primary PSAP for Stone Park.

The system is a consolidation of long existing 9-1-1 Primary PSAPs that have been located within a consolidated 9-1-1 center (NORCOMM 9-1-1) for a period of years and is established. All members of the Authority have passed ordinances and intergovernmental agreements to dissolve the previously established ETSB that served their community. Copies of the intergovernmental agreements and ordinances have been attached to our submission.

As an established 9-1-1 center meeting standards and requirements for 9-1-1 center operations. The center dispatches currently for six (6) police and ten (10) fire/ems agencies. After the proposed change, the number will remain the same as we currently dispatch for Stone Park Police and Fire Departments as a secondary PSAP. Bylaws have been established for the proposed Authority, with two (2) representatives from each community as voting members to the ten (10) person board.

1. The name of the certified 9-1-1 system provider is AT&T. Our system lies entirely in AT&T jurisdiction for wireline 9-1-1 services.

Plan Narrative:

2. There are no changes to the national standards, protocols and/or operating measures that will be followed within the Proviso-Leyden Joint 911 System. As in previously applied documents filed and approved by the ICC, NORCOMM is a facility built in 2005 with a non-advertised location, underground, with no less than two physical barriers to entry. We maintain monitoring systems for the facility, and meet standards related to backup power for our location using a combination of generator, UPS, and battery power from twelve (12) volt and forty-eight (48) volt systems. The 9-1-1 center maintains audio loggers sufficient to records for all phone and radio lines within the center, and redundant systems to maintain call records. We did upgrade to a NG911 capable phone system as of May 2018. This consolidation plan is a formalization of the step to ensure that surcharge money paid by 9-1-1 Authority residents is received by the Proviso-Leyden 9-1-1 Authority to support 911 functions.

Legacy equipment will be replaced with NG911 capable equipment to prepare for the state-wide network by May with a NG capable phone system currently being deployed at our center. Fiber and microwave backups exist along with other T-1 data connections to ensure continuity of operations. A timeline is being established to determine replacement systems as the new ETSB representation meets to discuss further enhancements to service. We are currently testing radio technology for our police and fire agencies.

There are no changes to how the databases are maintained. It is an ongoing, daily process. Changes are submitted through an electronic process or via paper submissions. Changes to the MSAG are submitted to Intrado within 24 hours of receipt. Modification or changes are verified as corrected when Intrado indicates work is completed. Additionally, our computer aided dispatch (CAD) database is updated to reflect the changes.

The 9-1-1 center provides five (5) in-house service technicians, and maintains contracts with vendors for the maintenance and repair of any of the 9-1-1 system architecture including all CPE and radio systems, and consoles.

FIVE YEAR STRATEGIC PLAN FOR MODIFIED PLAN

(Provide a detailed summary of the proposed system's operation, including but not limited to, a five-year strategic plan for implementation of the modified 9-1-1 plan with financial projections)

Narrative:

This executive summary of the 2017-2022 Strategic Plan is presented by NORCOMM Public Safety Communications, Inc. for the Proviso-Leyden Joint 911 Authority. This plan outlines the goals and objectives, financial management activities and strategic direction to be accomplished with the resources allocated by client funding, company investment, and other revenue streams.

The Proviso-Leyden Joint 911 Authority (referred to as the Authority) seeks to provide uniform, prompt, and efficient access to public and private safety services for the citizens of, and visitors to the cities, towns, villages, and districts that comprise our client agencies.

As an organization, we are focused on enhancing public safety communications answering systems, utilizing dedicated staff and agency personnel who are committed to serving citizens and responders with the highest quality services. To guide this effort, the Authority has developed this strategic plan providing the framework for assigning resources and determining the direction for the consolidated 9-1-1 center. The plan is a culmination of an extensive process involving APCO/NENA best practices, client and staff input.

The following strategic goals have been adopted to guide the Authority in fulfilling its mission:

Goal A: Enhance the quality of the 9-1-1 answering system to ensure that all citizens and visitors have access to public safety answering services that are reliable, redundant, secure and diverse.

Goal B: Enhance Network capabilities for emerging technologies, disaster recovery, and multi-jurisdictional cost efficiencies.

Goal C: Enhance the communication and information exchange between the Authority and public safety agencies to strengthen relationships to streamline operational polices.

Goal D: Ensure the financial stability of the Authority and public safety communications systems to sustain their long-term viability as state-of-the-art communications networks.

A total of 16 objectives have been established to guide NORCOMM's approach to accomplish the four goals. Each objective relates to a specific goal, which will be addressed in this strategic plan implementation process.

The strategic plan forms the basis for the tasks and strategies managed by the NORCOMM Management. We will ensure resources are appropriately allocated and committees are assigned activities in support of the goals. Strong local client support will be necessary to respond to the rapid workload and activity growth required for the Authority to effectively respond to the needs identified during the planning process.

There will be many more accomplishments to celebrate in the future. Our action plan will result in a consolidated 9-1-1 center that allows citizens to easily and effectively request emergency assistance, and permits public safety personnel to communicate as needed. The Authority will build on its past successes to continue the strongest possible public safety communications systems for local governments and their constituents.

ADJACENT AGENCIES LIST

Provide a list of public safety agencies and existing 9-1-1 Systems that are adjacent to the proposed system's boundaries. Each agency that appears on this list should also have signed a call handling agreement and/or aid outside jurisdictional boundaries.

TEST PLAN DESCRIPTION

1) Description of test plan (back-up, overflow, failure, database).

Annual testing of the back-up by review of SOG-53, the NORCOMM Evacuation Plan Standard Operating Guide, call testing with ATT for 9-1-1 trunks and callbox testing. Practice of the use of the NORCOMM backup center located at the Cicero 9-1-1 center through regular annual training and use for overflow when required for activities that require additional manpower. During the planned outage, we will coordinate calls with the wireline and wireless providers testing calls inbound to the 9-1-1 center. We will also test alternate communication methods such as backup radio channels and equipment at the backup center, such as CAD terminals.

2) List wireline exchanges to be tested.

AT&T wireline access is tested at regular intervals with NORCOMM responding to the local CO to use our backup phones to tie into the CO in case of an outage. NORCOMM also has participated in line diversity testing with ATT on 9-1-1 trunk lines to ensure system integrity, as well as having trunk lines coming from both the Lombard and Elk Grove locations. The lines are established and in place for all entities since 2013. ATT governmental group (Lisa Wirtanen) has built the diagram to allow for diversity of trunks as Stone Park Transitions to NORCOMM. We have discussed testing once the consolidation draws closer to conclusion.

3) List of wireless and VoIP Carriers to be tested.

AT&T, Comcast, Sprint, T-Mobile, Verizon, Cricket, MetroPCS and other listed carriers. We regularly update and test locations for cellular accuracy and changes to towers in the PSAP jurisdictions. In addition, we do call testing into the center as part of our regular operations. Testing for phase II has been tested with all carriers as well as text to 9-1-1. All vendors are notified of the PSAP that are currently part of NORCOMM and we receive test calls for all entities. As part of the Stone Park consolidating into the NORCOMM 9-1-1 center and the Proviso-Leyden Joint 9-1-1 Authority, we will test with the carriers as part of the consolidation.

FIVE-YEAR STRATEGIC PLAN
2017-2022

Proviso-Leyden Joint 9-1-1 Authority

2600 N. Mannheim Road
Franklin Park, IL 60131
847-451-8000

Executive Summary

This executive summary of the 2017-2022 Strategic Plan is presented by NORCOMM Public Safety Communications, Inc. for the Proviso-Leyden Joint 911 Authority. This plan outlines the goals and objectives, financial management activities and strategic direction to be accomplished with the resources allocated by client funding, company investment, and other revenue streams.

The Proviso-Leyden Joint 911 Authority (referred to as the Authority) seeks to provide uniform, prompt, and efficient access to public and private safety services for the citizens of, and visitors to the cities, towns, villages, and districts that comprise our client agencies.

As an organization, we are focused on enhancing public safety communications answering systems, utilizing dedicated staff and agency personnel who are committed to serving citizens and responders with the highest quality services. To guide this effort, the Authority has developed this strategic plan providing the framework for assigning resources and determining the direction for the consolidated 9-1-1 center. The plan is a culmination of an extensive process involving APCO/NENA best practices, client and staff input.

The following strategic goals have been adopted to guide the Authority in fulfilling its mission:

Goal A: Enhance the quality of the 9-1-1 answering system to ensure that all citizens and visitors have access to public safety answering services that are reliable, redundant, secure and diverse.

Goal B: Enhance Network capabilities for emerging technologies, disaster recovery, and multi-jurisdictional cost efficiencies.

Goal C: Enhance the communication and information exchange between the Authority and public safety agencies to strengthen relationships to streamline operational polices.

Goal D: Ensure the financial stability of the Authority and public safety communications systems to sustain their long-term viability as state-of-the-art communications networks.

A total of 16 objectives have been established to guide NORCOMM's approach to accomplish the four goals. Each objective relates to a specific goal, which will be addressed in this strategic plan implementation process.

The strategic plan forms the basis for the tasks and strategies managed by the NORCOMM Management. We will ensure resources are appropriately allocated and committees

are assigned activities in support of the goals. Strong local client support will be necessary to respond to the rapid workload and activity growth required for the Authority to effectively respond to the needs identified during the planning process.

There will be many more accomplishments to celebrate in the future. Our action plan will result in a consolidated 9-1-1 center that allows citizens to easily and effectively request emergency assistance, and permits public safety personnel to communicate as needed. The Authority will build on its past successes to continue the strongest possible public safety communications systems for local governments and their constituents.

Mission Statement

Answering the call to help those in need

Vision Statement

We are committed to providing cost effective emergency dispatch services through innovation, accuracy and exemplary customer service. We answer all 9-1-1 and non-emergency calls with professionalism, integrity and compassion while efficiently dispatching police, fire and emergency medical services. To attain effective emergency dispatch services, we must establish professional standards. We must attract, train, and retain the most qualified employees necessary to provide this service. We must find positive solutions to every problem. Customer service is essential to our success, so we treat each caller with empathy and respect. We routinely offer life-saving medical instructions in addition to providing accurate information to our public safety agencies. We are the first, first responders.

Goals and Objectives

In order to fulfill its mission, the Authority has established four major goals for the years 2016 through 2022. These goals with their accompanying objectives are realistic and measurable. Completion of the goals will enable the Authority to build upon prior achievements by strengthening our consolidated 9-1-1 center.

Reaching these goals relies heavily on the support of the client agencies and personnel.

Goal A: Enhance the quality of the 9-1-1 answering system to ensure that all citizens and visitors have access to public safety answering services that are reliable, redundant, secure and diverse.

Objective 1 - Ensure ongoing quality maintenance and operations of Authority equipment; continue to work with our vendors to ensure preventative maintenance.

Objective 2 - Improve the redundancy and security of the existing systems.

Objective 3 – Enact text-to-9-1-1 to ensure that visitors and constituents within our communities have as much access to 9-1-1 services as possible.

Objective 4 – Enhance 9-1-1 mapping system capabilities through the use of our phone and computer aided dispatch systems

Goal B: Enhance Network capabilities for emerging technologies, disaster recovery, and multi-jurisdictional cost efficiencies.

Objective 1 – Continue to develop the 9-1-1 center to include additional agencies in order to continue to build upon the consolidated center by maximizing our resources while providing a level of service consistent with our mission and vision statement.

Objective 2 – Leverage capabilities of our IT staff and IT Support Vendors and our partners to ensure data backup.

Objective 3 – Improve upon network infrastructure and connectivity to our partner agencies using shared resources to create an economy of scale for our partners.

Objective 4 – Review and plan for the implementation of Next Generation 9-1-1 (NG911) as standards become more defined. NOTE –This Objective is conditional upon the ongoing activities of the 9-1-1 Service Advisory Board who has been tasked with modifying Administrative Rules that are applicable to Public Act 99-0006. The activities of the 9-1-1 Advisory Board, in cooperation of the Illinois State Police's Director of 9-1-1 will dictate the manner in which NG911 will be deployed throughout the State of Illinois.

Objective 5 – Work with client agencies to develop a backup 9-1-1 center.

Goal C: Enhance the communication and information exchange between the Authority and public safety agencies and strengthen relationships to streamline operational polices.

Objective 1 - Coordinate the functionality of the Computer Aided Dispatch System to allow agencies to share intelligence data by hosting User group meetings.

Objective 2 – Continue bi-monthly Advisory Board meeting between police and fire agencies to maintain open lines of communications and form any new committees as needed.

Objective 3- Promote enhanced educational and outreach programs to strengthen the community's awareness of and support for public safety communications initiatives.

Appendix A

Goal A: Enhance the quality of the 9-1-1 answering system to ensure that all citizens and visitors have access to public safety answering services that are reliable, redundant, secure and diverse.

Goal A - Objective 1:

Ensure ongoing quality maintenance and operations of 9-1-1 equipment; continue to work with our vendors to ensure preventative maintenance.

Action Plan

Design and implement a management system for tracking all assets and maintenance service agreements for all software and hardware. Records will include CPE upgrade, maintenance, and hardware refresh schedules; mapping upgrade, maintenance, and hardware refresh schedules; and UPS install and maintenance records.

Goal A – Objective 2:

Improve the redundancy and security of the existing systems.

Action Plan

Develop Operating standards related to computer security. Complete an internal audit of systems, and Implement protocols to meet CJIS and other industry standards based upon the audit results. Potentially bring in outside assistance to consult and maintain systems.

Goal A – Objective 3:

Enact text-to-9-1-1 to ensure that visitors and constituents within our communities have as much access to 9-1-1 services as possible.

Action Plan

Work with wireless industry providers to implement access and protocols for wireless 9-1-1 access. Once the system has been tested thoroughly, and after a meeting with client agencies to establish response guidelines, deploy the system. Follow up the deployment of wireless 9-1-1 with a public education campaign to the constituents of our client agencies.

Goal A – Objective 4:

Enhance 9-1-1 mapping system capabilities through the use of our phone and computer aided dispatch systems.

Action Plan

Internal GIS mapping staff will work with our CAD vendor to improve and validate MSAG data to create a more accurate mapping program for our personnel. Using purchased software from GIS vendors and taking advantage of available resources, we will continue to make improvements.

Goal B: Enhance Network capabilities for emerging technologies, disaster recovery, and multi-jurisdictional cost efficiencies.

Goal B – Objective 1:

Continue to develop the 9-1-1 center to include additional agencies to continue to build upon the 9-1-1 consolidated center maximizing our resources while providing a level of service consistent with our mission and vision statement.

Action Plan

In addition to adding agencies to build an economy of scale for our agencies in a controlled manner, the Authority will look for opportunities to provide systems that benefit all of our agencies. Items such as improved radio systems will be an ongoing goal.

Goal B – Objective 2:

Leverage capabilities of our IT staff and our partners to ensure data backup.

Action Plan

Create a migration path to begin implementation of an off-site, secured facility to house a full backup of agency data related to the CIS system. Implementation will include a Standard Operation Procedure (SOP) for the security and access of the network.

Goal B – Objective 3:

Improve upon network infrastructure and connectivity to our partner agencies using shared resources to maximize economy of scale for our partners.

The Authority will look to FirstNet to improve network capability connecting all agencies, and make further improvements as NG911 comes to fruition. Connectivity to the 9-1-1 center from client agencies by redundant, reliable paths such as fiber and microwave remain a priority.

Goal B – Object 4:

Review and plan for the implementation of Next Generation 9-1-1 (NG911) as standards become more defined.

Action Plan

The Authority will continue to monitor the standards for NG911 and submit feedback to state and national committees in the interests of the center and our clients.

NOTE –This Objective is conditional upon the ongoing activities of the 9-1-1 Service Advisory Board who has been tasked with modifying Administrative Rules that are applicable to Public Act 99-0006. The activities of the 9-1-1 Advisory Board, in cooperation of the Illinois State Police’s Director of 9-1-1 will dictate the manner in which NG911 will be deployed throughout the State of Illinois.

Goal B – Objective 5:

Work with client agencies to develop a backup 9-1-1 center.

Action Plan

The Authority will look to partner with an agency to create a backup 9-1-1- center that can serve our client agencies. The center will need to be capable of call handling and police/fire dispatch.

Goal C: Objective 1:

Coordinate the functionality of the Computer Aided Dispatch System to allow agencies to share data by hosting CIS User group meetings.

Action Plan

The Authority will host quarterly CAD user group meetings to enhance and define the system to meet the needs of our client agency. The CAD system is at the heart of how a consolidated 9-1-1-center operates. Upgrades and scheduled repairs will be given a week notice to all of our clients.

Goal C: Objective 2:

Continue bi-monthly Advisory Board meetings between police and fire agencies to maintain open lines of communication.

Action Plan

The Authority believes that each public safety partner of our consolidated 9-1-1 center is also a partner with the agencies that form the Authority. Working together to streamline policies procedures, and guide future enhancements is a key to our success.

Goal C: Objective 3:

Promote enhanced educational and outreach programs to strengthen the community's awareness of and support for public safety communications initiatives

Action Plan

As the future of 9-1-1 grows to meet increasing demand and technological changes, we believe it is critical to educate and inform the public about these changes. We will actively partner with each agency to educate our customers and constituents about the current state of 9-1-1 and the changes in the future.

- c. There exists an emergency which generates a volume of 9-1-1 emergency calls that overloads the capacity of the PSAP.

8. **No Dispatch Service.** The Parties Back-up PSAP shall not provide dispatch of the emergency services of the Parties PSAP as a part of this Agreement. In accordance with protocols agreed to by the Parties, the "requested service" to be provided by the Parties Back-up PSAP shall consist of receiving calls forwarded to the Back-up PSAP from the other Parties PSAP and then forwarding the emergency information so received via telephone to a designated agency of the Parties for its dispatch of emergency personnel. The Parties shall provide to the Back-up PSAP such equipment, information, software, maps, guides, etc. as are necessary for the Parties Back-up PSAP to immediately determine the location of the emergency and the proper response service to be contacted.

9. **Dispatch of the Parties PSAP employees to assist in providing requested services.**

- b. **Scheduled Back-up Service.** When the Parties Back-up PSAP is asked to provide the requested services for interruption of 9-1-1 services caused by the need to temporarily suspend said services during scheduled maintenance of the Parties PSAP facilities or equipment, the Parties shall provide the Back-up PSAP with written notice of said scheduled service interruption with a minimum of forty-eight (48) hours prior to said interruption. The written notice shall provide a good faith estimate of the duration of the interruption of services. The Parties agree to provide, at the request of the Parties Back-up PSAP Supervisor, a minimum of two (2) Loaned Dispatchers to perform 9-1-1 services on the premises of the Parties Back-up PSAP Facility for the duration of the time the Back-up PSAP is performing the requested services.

10. **Other Liabilities.** The Parties agree to defend, indemnify and hold harmless the other Party from any claims alleging bodily injury, including death, and/or property damage, arising out of the performance of the loaned 9-1-1 dispatchers during times that they are providing the requested services. Nothing in this Agreement is intended in any way to waive or in any manner diminish any immunities from civil liability that either the Proviso-Leyden 9-1-1 Authority (NORCOMM) or CICERO ETSB or any employees or agents of either entity otherwise are granted by State law, including but not

limited to, the Local Governmental and Governmental Employees Tort Immunity Act. (745 ILCS 10/1-101 et seq), or the Emergency Telephone System Act 50 ILCS 750/1. Et seq.
