NARRATIVE STATEMENT:

(Provide a detailed summary of system operations for a modified 9-1-1 plan. Also, if incorporating an NG9-1-1 solution, please include the additional items listed below pursuant to 1325.205 b)12).

- 1) Indicate the name of the certified 9-1-1 system provider being utilized.
- 2) Explain the national standards, protocols and/or operating measures that will be followed.
- 3) Explain what measures have been taken to create a robust, reliable and diverse/redundant network and whether other 9-1-1 Authorities will be sharing the equipment.
- 4) Explain how the existing 9-1-1 traditional legacy wireline, wireless and VoIP network, along with the databases, will interface and/or be transitioned into the NG9-1-1 system.
- 5) Explain how split exchanges will be handled.
- 6) Explain how the databases will be maintained and how address errors will be corrected and updated on a continuing basis.
- 7) Explain who will be responsible for updating and maintaining the data, at a minimum on a daily basis Monday through Friday.
- 8) Explain what security measures will be placed on the IP 9-1-1 network and equipment to safeguard it from malicious attacks or threats to the system operation and what level of confidentiality will be placed on the system in order to keep unauthorized individuals from accessing it.

Plan Narrative:

The Wabash County Emergency Telephone System Board is requesting to change its 9-1-1 System Service Provider (9-1-1 SSP) from NG911, Inc. to INdigital telecom (INdigital). The existing Solacom IP Selective routing system will be re-provisioned as an IP based NG911 call handling system. The Wabash County ETSB is upgrading their call delivery system, to ensure that all carriers are connected directly to the selective routers serving the PSAP(s). The 9-1-1 system will comply with all State and Federal requirements and be compliant with the National Emergency Number Association standards.

The network will be provisioned as an IP based, Next Generation i3 capable network and will deliver calls using IP technology to the PSAP. All access to the systems is secured by individual user level two factor login credentials. The IP based 9-1-1 call delivery network is private with no outside access. Redundant Legacy Network Gateways (LNG's) and Emergency Service Routing Proxy's (ESRP's) otherwise referred to as selective routers will handle all call routing for the PSAP. One set of call routing elements is located in the Consolidated Communications Mattoon, IL Central Office and the other is located in the Shawnee Communications Central Office in Rosiclare, IL.

INdigital is an established 9-1-1 SSP in the State of Illinois as well as in multiple other states and will be using the same security protocols that are currently working in its established systems throughout Illinois. INdigital's network is compliant with NENA standards and with FCC 13-158 network reliability and security requirements.

Carrier network deployment stages:

Stage 1:

The OSP/Carrier trunks will remain connected to Frontier's Carbondale central office. New network connections will be established from Carbondale to gateways located at the existing data centers in Murphysboro and Harrisburg. 9-1-1 calls will be directed over the new INdigital connections at Carbondale to the gateways at the data centers and then be delivered to INdigital's IP based selective routers/ESRPs located in Mattoon and Rosiclare for selective routing to the appropriate PSAP. 9-1-1 Selective Routing for 9-1-1 call delivery and Automatic Number Identification (ANI) and Automatic Location Identification (ALI) delivery will be provided by the INdigital 9-1-1 IP based selective routers/ESRPs and ALI database management system.

The Solacom Controller equipment that is currently located at Harrisburg and Murphysboro, will be re-configured by the contracted maintenance provider to perform as strictly ANI/ALI Controllers. Selective routing will be performed by the INdigital selective routers and FIPS codes will be provided with delivery of

Plan Narrative:

of the call to the ANI/ALI controllers to indicate the appropriate PSAP for 9-1-1 call delivery. The Solacom ANI/ALI controllers will retrieve the ALI information from INdigital's Database Management System (DBMS) and deliver it to the PSAP call station equipment. The current Datamaster System will also be re-configured at this time by the contracted maintenance provider to no longer provide ALI information to the PSAPs.

During Stage 1, INdigital will mirror the current ALI database by requesting a copy of the 9-1-1 Database from Frontier who is currently administering the 9-1-1 database as a subcontractor. INdigital will also request a copy of the MSAG from the 9-1-1 System and will use established update processes with Frontier until the Stage 2 carrier migration is complete.

The current ESInet that exists between the two data centers and the PSAP will remain in place for call delivery. INdigital will install tertiary internet connections to the PSAP along with INdigital's MEVO backup solution prior to the Stage 1 cutover. The PSAP will have the ability to use the hot standby disaster recovery platform in an 'active + active' 9-1-1 delivery platform. This will be used as a backup during the Stage 1 cutover providing the PSAP with the ability to receive 9-1-1 calls with ANI and ALI should there be any issues during the Stage 1 cutover.

Split exchanges will route as they are currently routing today. PS ALI subscriber calls will also be routed as they are today.

INdigital will work with Wabash County to perform test calls to make sure all 9-1-1 calls are routing properly with ANI/ALI to the PSAP prior to the cutover and then immediately following the Stage 1 cutover to ensure all calls are being delivered to the proper PSAP with the correct ANI and ALI. Overflow and backup routing will be mirrored and will also be tested along with transfer capabilities.

Stage 2:

The OSPs/Carriers that are currently connected to Carbondale for Wabash County will establish new 9-1-1 trunks to the INdigital selective routers/or LNGs that are located in Mattoon and Rosiclare, Illinois. INdigital will work with each carrier to determine the type of trunk signaling and establish points of interconnection for 9-1-1 call delivery.

INdigital leases facilities with other certified carriers in Illinois to build out its network and establish Points of Interconnection (POI's) with other certified carriers within the state. All facility orders are requested by INdigital through the Access Service Request (ASR) system. INdigital will be establishing facilities to allow interconnection with each carrier during Stage 2 of the project. Typically, multiple carriers are used based on facility availability and diversity requirements and are determined while coordinating interconnections with the participating carriers during the Stage 2 project implementation calls. INdigital takes responsibility for performance and maintenance of all leased facilities. Stage 2 network diagrams will be developed and submitted after being finalized during the industry project management calls with the carriers. All participating carriers, including third-party network aggregators will be identified, notified and included in the Stage 2 project implementation calls. Finalized costs will be requested from the ILEC's and submitted during this period as well. The Stage 2 Final Network Diagram and carrier costs will be submitted to the ISP and the ICC by the 9-1-1 System.

Router to router trunks will be established between INdigital's ESRP's and selective routers owned by other 9-1-1 SSP's for routing of split exchanges where necessary.

INdigital will administer the 9-1-1 database and MSAG for the subscribers that reside in the service territory of the consolidated system. INdigital will request TN loads and establish update processes with the participating OSP/Carriers prior to the cutover and assume all 9-1-1 SSP administrative responsibilities for the database at the time of conversion. INdigital will work with the OSP/Carriers and the 9-1-1 System to keep the database current and in compliance with Illinois State law, on an ongoing basis.

INdigital will mirror current call transfer conditions at the time of conversion for Wabash County. INdigital will also implement 9-1-1 call transfer with ANI between neighboring counties of the Consolidated system where possible, post-conversion.

FIVE YEAR STRATEGIC PLAN FOR MODIFIED PLAN

(Provide a detailed summary of the proposed system's operation, including but not limited to, a five-year strategic plan for implementation of the modified 9-1-1 plan with financial projections)

Narrative:

Wabash County plans to work with INdigital to complete a network that connects all carriers directly to our systems. This plan includes potential consolidation and elimination of redundant trunks, as well as connecting VoIP and wireless carriers to the network. Added redundancy with the addition of backup phones on a separate network will create a more reliable system. Wabash County plans to connect to the statewide network as it is developed in the next few years, creating a more reliable system for citizens of the county and the state.

ORDINANCE

WHEREAS, the State of Illinois has enacted into law the Emergency Telephone System Act (the "Act"); and

WHEREAS, the Act enables counties and municipalities to impose a surcharge upon all telephone subscribers passed through telecommunication carriers at a rate per network connection in order to implement and/or upgrade and maintain a "9-1-1" emergency telephone system; and

WHEREAS, the Act allows the telecommunications carrier collecting the surcharge to deduct three per cent (3%) of the gross amount of surcharge collected; and

WHEREAS, the Act further provides that before the surcharge may be imposed it must be authorized by a majority of the voters in a referendum by the county or municipality; and

WHEREAS, the County Board of Wabash County, Illinois deems it to be in the best interest of the County to implement and/or upgrade and maintain an "Enhanced 9-1-1" emergency telephone system and to impose a surcharge on subscribers collected by the telecommunications carrier to pay for the costs associated therewith.

**NOW, THEREFORE, BE IT ORDAINED BY THE COUNTY BOARD OF
WABASH COUNTY, ILLINOIS**, as follows:

Section One. A surcharge is hereby imposed, subject to the provisions of Section Two, upon all telephone subscribers passed through telecommunications carriers engaged in the business of transmitting messages by means of electricity originating within the corporate limits of Wabash County and terminating within the State of Illinois for funding of an "Enhanced 9-1-1" emergency telephone system.

Section Two. A referendum shall be placed by the County Clerk on the April 1, 1997 ballot for all legal voters residing in the County to vote upon the following question:

Shall the County impose a surcharge of up to Two and 50/100 Dollars (\$2.50), per month, per network connection, which surcharge will be added to the monthly bill you receive for telephone or telecommunications charges for the purpose of installing an "Enhanced 9-1-1" emergency system?

_____ Yes _____ No

Section Three. If a majority of the votes cast upon the question are in favor thereof, a surcharge is hereby imposed at a rate of Two and 50/100 Dollars (\$2.50), per month, per in-service network connection, as hereinafter defined. A network connection shall not be deemed to be in service where a subscriber's account is uncollectible.

Section Four. For purposes of this Ordinance, the following definitions shall apply:

- a. "Network Connection" means the number of voice grade communication channels directly between a subscriber and a telecommunications carrier's public switched network without the intervention of any other telecommunications carriers switched network which would be required to carry the subscriber's interpremises traffic.
- b. "Transmitting Messages" shall have the meaning ascribed to the term in Section 8-11-2 of the Illinois Municipal Code.
- c. "Telecommunications Carrier" means any natural individual, firm, trust, estate, partnership, association, joint stock company, joint venture, corporation, municipal corporation or political subdivision of this State, or a receiver, trustee, conservator or other representative appointed by order of any court engaged in the business of transmitting messages by means of electricity.
- d. For the purposes of this Act, "telecommunication carrier" does not include a cellular or other mobile communication carrier.

Section Five. The County Clerk shall provide any telecommunication carrier subject to the surcharge with a certified list of those network connections assigned to the County to be exempt from imposition of the surcharge. The certified list may be revised by the County on sixty (60) days' prior written notice provided to the telecommunication carriers.

Section Six. The surcharge shall be imposed on the first day of the month following the expiration of ninety (90) days from the date the County Clerk certifies to the individual telecommunication carriers subject to the surcharge that the referendum referred to in Section Two has passed.

Section Seven. In lieu of the telecommunication carriers imposing a three per cent (3%) accounting and collection charge on its subscribers as permitted under the Act, each telecommunications carrier is hereby authorized and instructed to recover said accounting and collection charge by deducting three per cent (3%) from the gross amount of surcharge collected otherwise due and owing the County prior to remittance under Section Eight of this Ordinance.

Section Eight. The amount of surcharge collected by the telecommunications carrier shall be paid to the particular municipality or county or Joint Emergency Telephone System Board not later than thirty (30) days after the surcharge is collected, net of any network or other 9-1-1 or sophisticated 9-1-1 system charges then due the particular telecommunication carrier, as shown on an itemized bill and the three per cent (3%) accounting and collection charge described in Section Seven.

Section Nine. Simultaneously with the remittance described in Section Eight above, each telecommunication carrier shall make a return to the County Treasurer for

the period to which the remittance applies, stating as follows:

1. The name of the telecommunication carrier.
2. The telecommunication carrier's principal place of business.
3. The number of network connections to which the surcharge applies.
4. The amount of surcharge due.
5. Such other reasonable and related information as the corporate authorities may require.

Section Ten. If it shall appear that an amount of surcharge has been paid which was not due under the provisions of this Ordinance, whether as the result of a mistake of fact or an error of law, then such amount shall be credited against any surcharge due, or to become due, under this Ordinance from the telecommunication carrier who made the erroneous payments; provided that no amounts erroneously paid more than three (3) years prior to the filing of a claim therefor shall be so credited. Ninety (90) days' prior notice shall be given to the Emergency Telephone System Board on any credit against a surcharge due.

Section Eleven. No action to recover any amount of surcharge due under the provisions of this Ordinance shall be commenced more than three (3) years after the due date of such amount.

Section Twelve. If any section, sub-section, sentence, clause, phrase, or portion of this Ordinance is for any reason held invalid or unconstitutional by any Federal or State court, or administrative or governmental agency of competent jurisdiction, such portion shall be deemed a separate, distinct and independent provision, and such holding shall not affect the validity of the remaining portions thereof.

This Ordinance shall become effective immediately upon execution thereof.

15.5. Headings. The headings in the Agreement (including these Terms) are for reference only and do not affect the interpretation of the Agreement (including these Terms).

15.6. Entire Agreement. The Agreement, together with these Terms and any other documents incorporated by reference into the Agreement (and, if applicable, together with the Software Support and Maintenance Agreement), constitute the sole and entire agreement of the Parties with respect to the subject matter of the Agreement and supersede all prior and contemporaneous understandings, agreements, representations and warranties, both written and oral, with respect to such subject matter.

15.9. Amendment and Modification; Waiver. 15.10. Severability. If any provision of the Agreement (including these Terms) is invalid, illegal or unenforceable in any jurisdiction, such invalidity, illegality or unenforceability shall not affect any other term or provision of the Agreement (including these Terms) or invalidate or render unenforceable such term or provision in any other jurisdiction. On such determination that any term or other provision is invalid, illegal or unenforceable, the Parties shall negotiate in good faith to modify the Agreement so as to effect the original intent of the Parties as closely as possible in a mutually acceptable manner in order that the transactions contemplated by the Agreement (including these Terms) be consummated as originally contemplated to the greatest extent possible.

15.11. Governing Law. The Agreement (including these Terms) is governed by and construed in accordance with the internal laws of the State of Illinois without giving effect to any choice or conflict of law provision or rule that would require or permit the application of the laws of any jurisdiction other than those of the State of Illinois. Customer acknowledges and agrees that a breach or threatened breach by Customer of any of its obligations under Section 3 of these Terms (Use Restrictions), Section 5 of these Terms (Confidentiality), Section 8 of these Terms (Intellectual Property Rights) or Section 11 of these Terms (Indemnification) would cause INdigital irreparable harm for which monetary damages would not be an adequate remedy and that, in the event of such breach or threatened breach, INdigital will be entitled to equitable relief, including in a restraining order, an injunction, specific performance and any other relief that may be available from any court of competent jurisdiction, without any requirement to post a bond or other security, or to prove actual damages or that monetary damages are not an adequate remedy. Software / Services Description

1. **GIS and Database Services.** Location Database services for the PSAP. Repository for ALI. Legacy wireline records in the Wabash County, IL service area will be processed by INdigital using industry standard record exchange and correction methods. i2 format ALI service (wireless, VoIP - using pANI) will be provided by INdigital, once complete all records will be geocoded using industry defined methods for location-based call routing. INdigital will utilize an

advanced IP Selective Router (IPSR) and associated i3 functional elements associated with geodetic data to deliver calls to the CSI Next Gen enabled 9-1-1 public safety answering points (PSAPs). Once INdigital has the appropriate data, INdigital will develop the call delivery solution based upon the geography of an incoming call.

2. **Routing Services.** Routing services and methodologies include; traditional Selective Routing tables, Dialed Number Identification Service, Geographic Information System, as well as various hybrid configurations of Automatic Location Identification and Selective Routing tables. INdigital also supports location by value, location by reference, traditional ALI lookup, and ALI steering by use of our NGALI Service.
3. **Network Services.** INdigital will provide access for all CSI members with access to the www.il911.net PSAP Toolkit. This Toolkit contains comprehensive KPI such as call detail reports, trouble ticket management, 24/7/365 Network Operations center with chat, ticket entry/tracking, training, and documentation assets related to each specific member's call processing and reporting needs.
4. **MEVO Services.** MEVO Services are delivered from a completely independent call processing system that operates in parallel to the INdigital Next Gen Core Service (NGCS) routing platform, which can bypass the primary 9-1-1 CPE. The MEVO System facilitates INdigital's ability to re-route 9-1-1 calls from a primary 9-1-1/NG9-1-1 CPE platform to a MEVO Station, which is an advanced IP phone with the ability to process 9-1-1 and Administrative calls. As a core component of this solution, INdigital will install a commodity Internet connection to each CSI PSAP for backup call delivery to MEVO Stations. (1) MEVO Station is included as part of this original contract between CSI and INdigital, any county that is interested in contracting additional MEVO Stations can do so by contacting INdigital to negotiate service, installation and configuration of each additional phone.
5. **Call Delivery Network.** "INdigital has agreed to take over as the 9-1-1 System Service Provider (SSP) to each member of the Counties of Southern Illinois (CSI). INdigital will install (1) carrier grade IP circuit to each CSI Solacom host controller site (Jackson and Saline Counties) to deliver 9-1-1 services to the members of CSI which are connected to a regional ESInet operated by a separate CPE service provider. INdigital will deliver 9-1-1 services to gateway devices with final call delivery to Solacom IWS, being the responsibility of the current 9-1-1 CPE system provider. Backup connections being delivered individually to each PSAP as outlined above in item 4 – MEVO Services. In the event that CSI is dissolved, or if (contracting county) is no longer a party to CSI, 9-1-1 calls would be rerouted so as not to go through the CSI Solacom host controller."
6. **Transfers.** In the event a CSI PSAP requires the use of selective transfer functions, the Host 911 System sends the call with the proper agency identified in the PIDF-LO + Service URN to the INdigital ESInet based ESRP. The ESRP then queries the ECRF with LoST and receives Service URI for delivery to next hop location such as another ESRP or Responder Agency.
7. **Backup and Overflow Call Routing.** Backup and Overflow call routing to be determined during final (post contract) engineering meetings.

CONSUMER DISCLOSURE

From time to time, INdigital (we, us or Company) may be required by law to provide to you certain written notices or disclosures. Described below are the terms and conditions for providing to you such notices and disclosures electronically through the DocuSign, Inc. (DocuSign) electronic signing system. Please read the information below carefully and thoroughly, and if you can access this information electronically to your satisfaction and agree to these terms and conditions, please confirm your agreement by clicking the 'I agree' button at the bottom of this document.

Getting paper copies

At any time, you may request from us a paper copy of any record provided or made available electronically to you by us. You will have the ability to download and print documents we send to you through the DocuSign system during and immediately after signing session and, if you elect to create a DocuSign signer account, you may access them for a limited period of time (usually 30 days) after such documents are first sent to you. After such time, if you wish for us to send you paper copies of any such documents from our office to you, you will be charged a \$0.00 per-page fee. You may request delivery of such paper copies from us by following the procedure described below.

Withdrawing your consent

If you decide to receive notices and disclosures from us electronically, you may at any time change your mind and tell us that thereafter you want to receive required notices and disclosures only in paper format. How you must inform us of your decision to receive future notices and disclosure in paper format and withdraw your consent to receive notices and disclosures electronically is described below.

Consequences of changing your mind

If you elect to receive required notices and disclosures only in paper format, it will slow the speed at which we can complete certain steps in transactions with you and delivering services to you because we will need first to send the required notices or disclosures to you in paper format, and then wait until we receive back from you your acknowledgment of your receipt of such paper notices or disclosures. To indicate to us that you are changing your mind, you must withdraw your consent using the DocuSign 'Withdraw Consent' form on the signing page of a DocuSign envelope instead of signing it. This will indicate to us that you have withdrawn your consent to receive required notices and disclosures electronically from us and you will no longer be able to use the DocuSign system to receive required notices and consents electronically from us or to sign electronically documents from us.

All notices and disclosures will be sent to you electronically

Unless you tell us otherwise in accordance with the procedures described herein, we will provide electronically to you through the DocuSign system all required notices, disclosures, authorizations, acknowledgements, and other documents that are required to be provided or made available to you during the course of our relationship with you. To reduce the chance of you inadvertently not receiving any notice or disclosure, we prefer to provide all of the required notices and disclosures to you by the same method and to the same address that you have given us. Thus, you can receive all the disclosures and notices electronically or in paper format through the paper mail delivery system. If you do not agree with this process, please let us know as described below. Please also see the paragraph immediately above that describes the consequences of your electing not to receive delivery of the notices and disclosures

electronically from us.

TEST PLAN DESCRIPTION

- 1) Description of test plan (back-up, overflow, failure, database).

Testing:

This is the minimum testing procedure to ensure that we have good working facilities and stable configurations. Persons placing test calls are required to be patient and polite. Testers are asked to confirm with INdigital's coordinator before placing each test call. The PSAP may become busy and testing may need to be suspended until an emergency situation can be handled.

1. Place a test call on existing trunks to establish a working baseline.
2. Migrate 9-1-1 traffic to ISUP trunks.
3. Place a test call on new ISUP trunks. Let the dispatcher know that there is no emergency and you are conducting a test call. Ensure that you have reached the correct PSAP, request that the dispatcher confirm the call ANI and ALI information.
4. Carrier Switching engineers will then block the last trunk used to deliver a call.
5. Repeat step 3.
6. Continue to block trunks and make test calls, until all trunks have been tested.

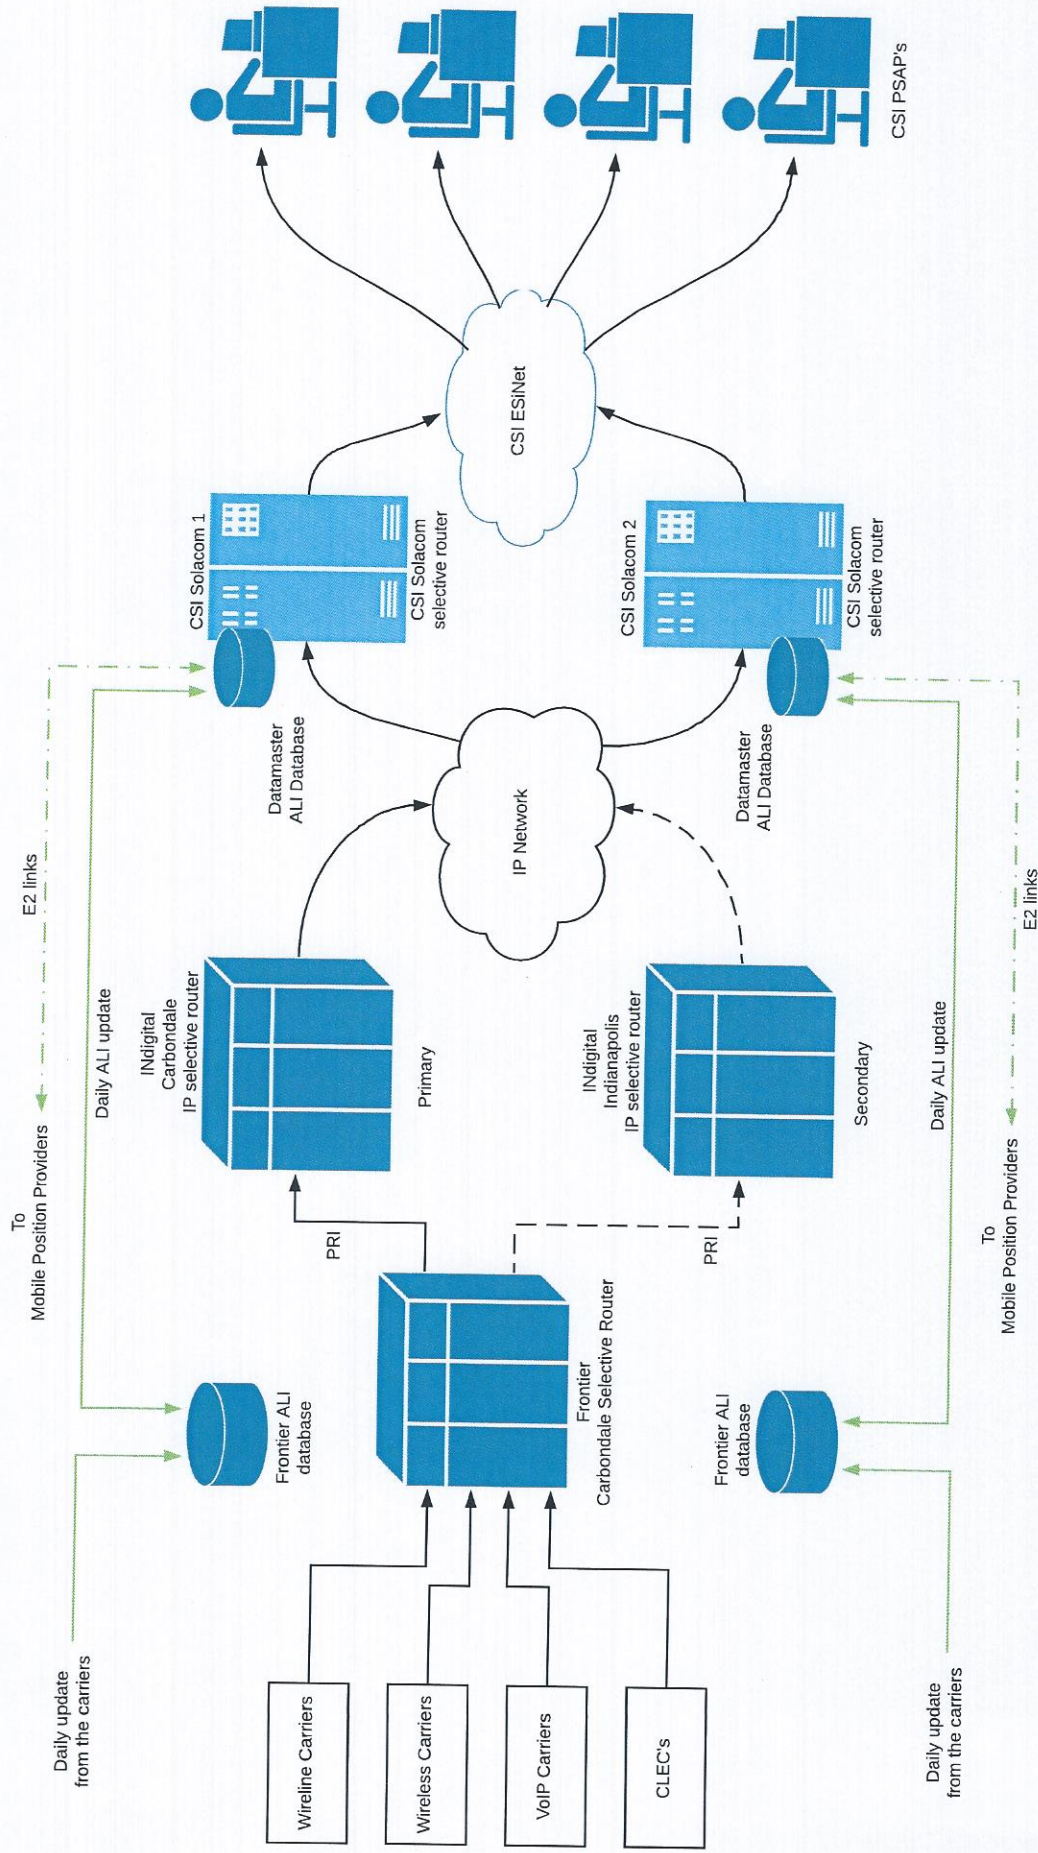

- 2) List wireline exchanges to be tested.
