FIVE YEAR STRATEGIC PLAN FOR MODIFIED PLAN

(Provide a detailed summary of the proposed system's operation, including but not limited to, a five-year strategic plan for implementation of the modified 9-1-1 plan with financial projections)

Narrative:

In anticipating for future consolidations the Cook County ETSB and Sheriff's Office began expanding 9-1-1 operations in July of 2015. The main center in Des Plaines currently has 20 full dispatch positions, 4 call taking positions and 8 positions that are building and waiting for computer equipment.

The Maywood backup center, which was renovated in 2017, has 10 dispatch positions. There are an additional 9 positions that are built and waiting for computer equipment.

The design of the Cook County next generation capable phone system from Zetron is unique in that it provides redundancy with a full independent system at the primary and backup sites. The system allows operators to select which controller they are using which essentially allows the backup center work simultaneously with the primary site. This increases the active call taking positions to 34 with room for 17 additional consoles that can be added as operations grow.

In 2017, through a partnership with the Illinois Department of Transportation, Cook County expanded the Motorola P1 CAD system to add an additional million calls for service per year. This expansion included a refresh of all server software and virtualizes the current environment. Infrastructure upgrades have brought the center up to date on all equipment. This has prepared the Cook County 9-1-1 Center to accept new consolidations without passing on the cost of technology or infrastructure to contract dispatch agencies.

TEST PLAN DESCRIPTION

1) Description of test plan (back-up, overflow, failure, database).

The CCETSB has enough capacity to add the Village of Hometown to its existing system with the need for additional lines. The main Cook County dispatch site is located at 9511 W. Harrison in Des Plaines. In the event of a phone line failure, the 9-1-1 lines can either be manually switched over in Des Plaines by staff or switched by the 9-1-1 Resolution Center to Northwest and/or Southwest Central Dispatch system by selective router. The CCETSB has a backup center located in the Cook County Sheriff's Police Headquarters located at 1401 S. Maybrook Drive in Maywood, Illinois. This location is tested on a monthly basis by 9-1-1 Center staff in coordination with the 9-1-1 Resolution Center. Northwest Central Dispatch and Southwest Central Dispatch Centers can handle the overflow calls in the event a trunk line is busy at the CCETSB. The current phone system, which is Zetron Max Call Taking, is connected from Des Plaines to Maywood through an Opt-E-Man circuit and has a backup of a point to point microwave connection. The connection is monitored by the smart switches which can automatically fail over in the event of a disruption. Support for this infrastructure is provided by the Cook County Network Control Center (NCC). In the event that both paths were disrupted, the Zetron controllers can function independently at both locations. The connection between Maywood and Des Plaines is not needed in order to have redundancy.
