

**SECTION II -
CRIME INDEX OFFENSE/
CRIME RATE DATA**

Crime Index Offense /Crime Index Arrest Data

This section presents crime index offenses, crime index arrests, drug arrests, and supplemental data offenses reported. The I-UCR crime index offenses and arrests include the categories of murder, criminal sexual assault, robbery, aggravated assault/battery (including attempted murder and ritual mutilation), burglary, theft (including burglary from motor vehicle), motor vehicle theft and arson. The drug arrest section includes the categories of violation of the Cannabis Control Act, violation of the Controlled Substances Act, violation of the Hypodermic Syringes and Needles Act, and violation of the Drug Paraphernalia Act. The supplemental data section includes the offenses of crimes against school personnel, crimes against children, domestic crimes, and hate crimes categories. Due to the volume of data reported, only state and county totals are published for the crime index arrest, drug arrest, and supplemental data categories.

Caution should be exercised when reviewing and using this information. Many social factors related to crime and a community's population must be considered when making statistical comparisons. A community may have a small residential population but a large transient population because of a substantial number of employers, motels, entertainment attractions, etc., within its jurisdiction. A large transient population increases the potential for criminal behavior within a small jurisdiction. The population-based crime rate calculation does not compensate for a transient population, and the statistics can make it appear that crime is more prevalent than reality would indicate.

The law enforcement employee information totals consist of sworn, civilian, and auxiliary personnel who were employed by sheriffs' offices, police departments (including those that report data directly and indirectly to the I-UCR Program), colleges and universities, as of October 31, 2000.

This section used the most recent complete census population statistics available from the U.S. Bureau of the Census. The 1999 crime rates for this section were calculated using the 1999 estimated population statistics which were obtained from the U.S. Bureau of the Census, released 1999. The 2000 crime rates were calculated using the 2000 U.S. Bureau of the Census actual census figures.

Due to differences between the 1999 population estimates and actual populations reported in the 2000 census, comparison of 1999 and 2000 crime rates may not accurately represent the true changes in crime patterns at the jurisdiction (within-county) level. Some portion of these population differences reflects true change in population (for example, increase and decrease due to annexation and population growth). It is difficult to determine, however, what portion of these population differences results from the dissimilarities between census year "real" count of persons and non-census year techniques to "estimate" that count. Isolating these differences is beyond the scope of Crime in Illinois, therefore the publication does not include comparisons of crime rates at the jurisdiction level.

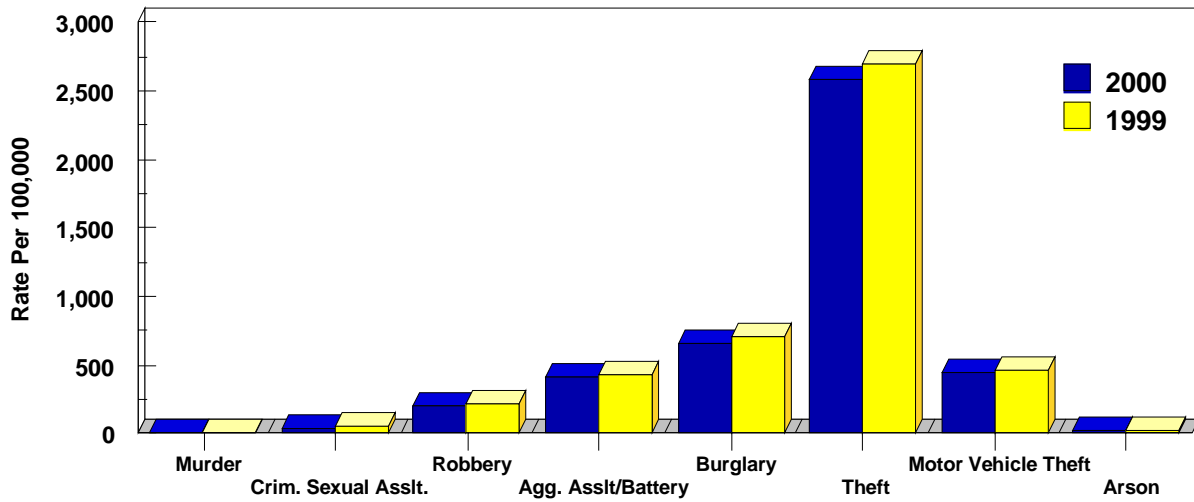

Each county total reflects crime data reported by police departments, sheriffs' offices, colleges and universities that are located within each county. Since the Secretary of State's Office has districts that have multi-county jurisdiction, the Secretary of State's Office totals are not reflected in the county total but are reflected in the state total. Data reported from non-traditional jurisdictions, such as hospitals, airports, etc., may have been previously reported by another reporting agency and are excluded from the state and county totals.

The Crime Index Offense/Crime Index Arrest/Crime Rate Comparison State Total is an aggregate total of the sheriffs' offices, police departments, colleges, universities and the Secretary of State's Office.

The footnotes in Section II are defined as follows:

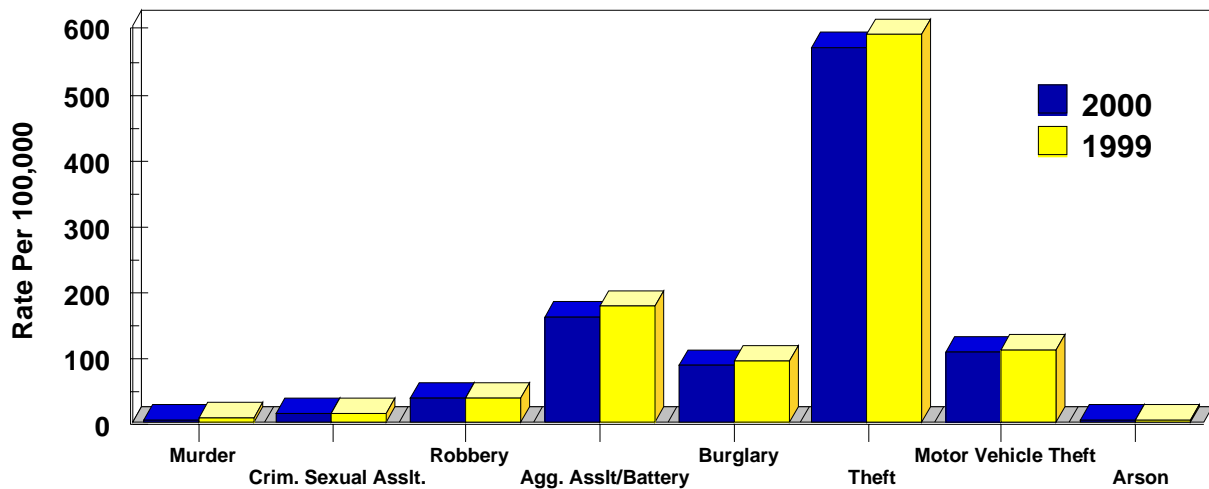

- 1 - "One or More Months Missing" indicates that an agency reports directly to I-UCR, but that one or more monthly UCR reports were delinquent for that reporting year.
- 2 - "No Index Crimes" indicates that an agency reported to I-UCR during the entire reporting year, but that the total number of index crimes for that year was zero.
- 3 - "Agency in Non-Compliance" indicates that the agency has reported UCR data in the past, but did not provide UCR reports at all during the reporting year.
- 4 - "Reported Through Other Agency" indicates that the agency reported their UCR data through another law enforcement agency during the reporting year.
- 5 - "Partial Year Reporting" indicates either a) that a law enforcement agency started direct reporting to I-UCR sometime during the reporting year; or b) a law enforcement agency ceased to exist or lost its officers sometime during the year, and UCR reporting was terminated.
