## Crime Trends - A Historical Perspective

This historical information is intended to provide a comprehensive perspective in crime trends. This graph illustrates the general trend in crimes reported in Illinois from 1974 to 2002. The Crime Index is composed of selected offenses used to gauge fluctuations in the overall volume and rate of crime reported to law enforcement. The offenses included are the violent crimes of murder, criminal sexual assault, robbery, and aggravated assault/battery (including attempted murder and ritual mutilation); and the property crimes of burglary, theft (including burglary from a motor vehicle), motor vehicle theft, and arson.

Crime trends may be analyzed using two separate methods: crime volume and crime rates. Crime volume is merely the aggregate total of the Crime Index. By comparing the crime volume from year to year, trends in the number of crimes reported to police can be studied. Crime rates are compiled to compensate for the changes in the size of population. Crime rates are generally expressed as the total number of index crimes per 100,000 inhabitants.

For ease of interpretation, the crime rate is shown for each year from 1974 through 2002. The term "Rate" refers to the number of crimes per 100,000 inhabitants. The crime rate is calculated by dividing the number of crimes reported to police by the jurisdictional population, and multiplying that number by 100,000.

### Considerations for interpretation:

On January 1, 1992, the Revised Illinois Uniform Crime Reporting Program, operating under the Federal Bureau of Investigation's National Incident Based Reporting System (NIBRS) criteria, became operational. This new system was used to collect data from 1992 through 1993. In 1994 the Illinois State Police implemented a new reporting procedure. Data was captured and provided to the Illinois State Police on a Monthly Crime Index Form ISP 2-423 (1/02) (see Appendix). Crime index offenses, crime index offense arrests and drug crime arrests were required to be reported by the local law enforcement agency. This same procedure is still in use to date. However, the change in reporting may have contributed to the decrease in Index offense rates from 1991-1993.

Effective July 1, 1984, sex crimes committed in Illinois were governed by a new statute entitled "Illinois Criminal Sexual Assault Act" (P.A. 83-1067). This statute repealed eight existing laws in Illinois including rape. On July 1, 1984, law enforcement agencies began reporting the new sex offenses to the I-UCR Program. The criminal sexual assault category reflects offenses reported as rape from 1972 through June 30, 1984. Effective July 1, 1984, offenses were reported as aggravated criminal sexual assault and criminal sexual assault.

## Crime Trends - A Historical Perspective

Violent crime offenses consist of murder, criminal sexual assault, robbery, and aggravated assault/battery (including attempted murder and ritual mutilation). Violent crimes accounted for 15.4 percent of the crime index total in 2002. Property crime offenses consist of burglary, theft (including burglary from a motor vehicle), motor vehicle theft, and arson. Property crimes accounted for 84.6 percent of the crime index total in 2002.

Note: See page 18 for the actual crime index offense rates and total number of offenses reported in each category for 1998-2002.

## Crime Trends - A Historical Perspective

With the exception of criminal sexual assault, violent crime index offense rates continue to decline. Murder and criminal sexual assault remain the smallest contributors to the overall violent crime index offense total.

Counties are considered urban if their population consists of at least 50,000 residents or if they contribute at least 50,000 residents to a total Metropolitan Statistical Area (MSA) of 100,000. An area qualifies for recognition as an MSA in one of two ways: (1) if it includes a city of at least 50,000 population, or (2) if it includes an urbanized area of at least 50,000 population with a total metropolitan population of 100,000. In addition to the county containing the main city or urbanized area, an MSA may include additional counties having strong economic and social ties to the central county. Those that are not part of an MSA are rural counties.
