

### **Corrected FBI Guidance on Warrant Arrests:**

**Agency arrests individual on warrant from other jurisdiction, without any local charges:** Agency should not report anything to NIBRS for this. The jurisdiction where the warrant originated will report the arrest (either as an arrest segment on a Group A incident report or arrest report as a 90z).

**Agency arrests individual on local charges and that individual also has a warrant from another jurisdiction:** Agency will report incident within their own jurisdiction. If the warrant from another jurisdiction is for a group A offense, they can either clear it exceptionally OR place a detainer on the individual, leave it alone, and then enter an arrest when they pick the person up. If the warrant from another jurisdiction is for a Group B offense, they must not report an arrest at this time. It will not be reported unless they also place a detainer on the individual and then may report an arrest at the time agency picks them up.
