September 6, 2024

Dear Agency Chief Executive:

Due to the responsibilities of the LEADS 3.0 message switch to translate numerous messages (i.e. legacy, NLETS, and NCIC), it is required that message keys utilized by legacy interfaces (CAD or mobile connections) be systematically decommissioned. A schedule has been established and communicated via the LEADS Daily Bulletin ([a27abf5e-b7dc-4ed8-b888-21d53d7f3728 \(illinois.gov\)](https://www.illinois.gov/a27abf5e-b7dc-4ed8-b888-21d53d7f3728)) to decommission keys over the next nine (9) months. The first set of message keys will be decommissioned on November 1, 2024; the second set on February 1, 2025; and the final set on June 1, 2025 – on these dates the message keys on these lists will cease to function.

As a result, legacy CAD and mobile interface communication with LEADS will be greatly diminished. As a reminder, the State provided software, LEADS Messenger, will continue to provide the entire population of LEADS message keys, ensuring all LEADS functionality is available.

Thank you for your continued efforts to transition to updated LEADS 3.0 technology (FoxTalk/OFML). All message keys are available in LEADS 3.0. Contact ISP LEADS Administration at [ISP.LEADSADM@illinois.gov](mailto:ISP.LEADSADM@illinois.gov) with questions or concerns.

Sincerely,

A handwritten signature in black ink, appearing to read "Chris Campbell".

Colonel Christopher Campbell
