

# SAFETY EDUCATION

Improving quality of life for Illinois citizens through unimpeachable **Integrity, Public Service, Training and Education.**

## DUI/Texting Simulators

Using a computer simulator, golf cart, or pedal kart, drivers are able to experience the dangers of texting while driving in a controlled environment.

In conjunction with “drunk” goggles, the same devices can also be used to demonstrate the dangers of driving under the influence of drugs or alcohol.

## Seat Belt Convincer

The seat belt convincer is a piece of equipment that simulates a 5-7 MPH crash. Sitting in a chair 20 feet from impact, passengers buckle their seat belt and slide down an incline to experience what it feels like to be in a crash. Although the crash is very minor, it demonstrates the importance of why people should buckle up.

## Rollover Simulator

The rollover crash simulator demonstrates what can happen to passengers if they are not buckled up. Dummies are placed into a rotating truck cab. At first, seatbelts are used and the dummies remain in the truck. When the seatbelts are removed, the dummies are thrown from the truck.

## Other programs offered include:

- Abuse/Abduction
- Active Shooter
- Bike Safety
- Bullying Prevention
- Child Safety Seat
- Computer Crimes
- Driver Education
- Drug Awareness
- DUI Prevention
- Farm Safety
